

Mega Twister SP

PREVENTION. PROTECTION. PEACE OF MIND.

indicative seal

Highly Tamper-evident, Pull Tight Twist Seals

1. Mega Twister SP seals are etched with permanent laser marking for name, logo, sequential numbers & barcode. Laser marking offers the highest level of security as it cannot be removed or replaced.
2. Heat staking technology is used to permanently affix the twister in the seal body. This technology will leave clear evidence of tampering if the seal is cut or forced open.
3. Colour coding is possible by combinations of clear transparent body and multi-coloured twister.

Specifications

Product	Material	Wire Length	Wire Diameter	Pull Strength	Marking Area	Max Marking Digits
Mega Twister SP	Polycarbonate body with ACETAL twister	Customised	SS with coated 0.8mm	30kg	12mm x 18mm	8
